

Shipping Service Weekly Bulletin – 19 June 2006

WFP Shipping Service, part of the WFP global organization, is a special operation that was set up in early October to provide sea transport for the humanitarian and recovery community in Aceh and Nias. We remain committed to providing you with “Service second to none!”

WFP Shipping Service Scales Down Operations

In an effort to create an environment that is competitive for commercial shipping companies operating in Indonesia as well as build capacity in the local economy, WFP Shipping Service will gradually begin to scale down operations in the region.

In order to ensure a smooth transition, WFP Shipping Service will offer guidance and support to local operators where possible as they begin operations in the region. The transition to commercial operators will eventually contribute to the future of an increasingly stable economic climate.

Sibolga – Nias Ferry Service:

Agencies are advised that as of 1 August 2006, WFP Shipping Service will no longer offer the regular Ferry Service between Sibolga and Nias. Commercial operators have been notified and encouraged to survey the route in an effort to assess the feasibility of providing a similar service.

Additionally, WFP Shipping Service will begin implementing cost recovery as early as August 2006. A complete list of rates will be released shortly.

Delays around the Region

Dredging on the quay side of shipping berths 201-203 in the port of Belawan has caused some berthing delays in the past week for WFP Shipping Service vessels. In addition, strong winds and rains have swept across the region creating challenging working conditions for the WFP Shipping Services operations.

LCT Ramps around the Region

Meulaboh: The new ramp has been completed and is already in use.

Sinabang: WFP Shipping Service is building a new ramp and repairing an old one. Both are expected to be completed in approximately 3 weeks time.

Ulee Lhueu: The LCT ramps in Ulee Lheue Port have been completed and are already in use.

Cargo Movement Request – New Version

Please be advised that a new version of the Cargo Movement Request (CMR) is available on our website. Kindly ensure that you use the new version when making your bookings.

Pipeline Update: *Weekly Running Total of Cargo Shipped Since Project Launch*

	MTs	Cbm
Cumulative total for week ending 5 June	35,963	119,372
